

# Juan Camilo Corrales Osvath

Software Engineer

+573163626771 | juanorralesosvath@gmail.com | [LinkedIn](#) | [GitHub](#)

---

## SUMMARY

Solution-oriented Software Engineer with experience in full-stack development, specializing in Node.js, TypeScript, and React, as well as in leading teams and projects end to end. Passionate about implementing Clean Code principles and SOLID architecture to build scalable applications. Experience co-founding and developing an own product from concept to production, and leading groups of people through planning, logistics, and budget management.

## EDUCATION

**B.S. in Software Engineering — ICESI University** | *Dean's List every semester*

2019 – Present

## PROFESSIONAL EXPERIENCE

**Junior Software Developer — Adenium CST**

Aug 2025 – Aug 2026

Wrote, tested, and fixed code for low- to medium-complexity tasks under the guidance of a senior team, contributing to a live production codebase. Built and refactored functions, components, and modules following project coding standards, investigated and resolved bugs reported by QA, and wrote unit tests to protect existing functionality from regressions. Managed code through Git (branching and pull requests), documented new functionality, and took part in Scrum ceremonies and code reviews.

**Full-Stack Developer — DataHome**

Feb 2021 – Aug 2021

Built and maintained React/TypeScript frontend components and Python backend endpoints across a remote team, improving the UI/UX of 3 key modules, shipping 10 new features, and refactoring legacy code to reduce complexity.

## RELEVANT EXPERIENCE

**Co-Founder & Full-Stack Developer — PastoralApp**

2026 – Present

Co-founded and develops PastoralApp, a platform for religious communities to organize their processes and track the formation of their members. Together with a co-founder, shaped the business idea and built the brand, logo, and business model, and has built the entire platform end to end — frontend and backend — using React, JavaScript, and Node.js. The application is already published and available on the Google Play Store.

**Leader — University Catholic Movement (MCU)**

2025 – Present

Has been leading a university group for 1 year, directing work teams and coordinating initiatives and activities. Planned and ran retreats and events for groups of 50 to 100 people: managed outreach and organization of attendees, sourced and negotiated with venue providers, and built and controlled budgets and costs for each activity, ensuring their financial and logistical viability.

**Human Activity Recognition System – Data & AI Developer (2025):** Collected and preprocessed data for a posture/movement classification model, including user interviews, label encoding, and dataset annotation (Label Studio); ran EDA and supported ML model validation.

**Gym Management Web App (MVP) – Full-Stack Developer (2025):** Built a gym management app (auth, class/coach admin, attendance and subscription tracking) using Next.js/Zustand on the frontend and NestJS REST APIs on the backend, including functional testing.

## SKILLS

**Languages:** JavaScript, TypeScript, Python, Java, Scala

**Backend & APIs:** Node.js, NestJS, RESTful APIs, ORMs, Spring Boot

**Frontend:** React, Next.js

**Databases:** PostgreSQL, MongoDB, SQL

**Tools & Practices:** Git/GitHub, Docker, Postman, unit testing, debugging, Agile/Scrum, code reviews

**Power Skills:** Fast, autonomous learning; clear technical communication; openness to feedback; team leadership; budget management; analytical problem-solving; teamwork

**Languages Spoken:** Spanish (Native), English (C2)

**Interests:** Physical activity, hiking, guitar, Catholic youth community volunteering
